

We offer a wide variety of cards including plain PVC, proximity, contact and contactless 'smart' cards as well as barcode and magnetic stripe technologies for access to additional services including access control, time and attendance systems or cashless vending.

We are able to supply a variety of cards including:

- HID Proximity and Smart cards
- Indala Access Cards
- Wiegand Cards
- Paxton Access Cards
- PAC
- TDSI
- Contactless chips including – Mifare, Legic & i-Code

Contact Cards

Contact cards have a chip placed in the PVC that can be read when in contact with the reader.

Contactless Cards

Contactless cards have an internal antenna embedded within the PVC which allows the sensor to read the information from a distance and therefore is more efficient in a busy area.

Plain ID Cards
